

Flight Training Device

EASA FTD 1&2, FNPT II MCC
FAA Level 5 & Level 6

- Optimizes crew competencies and reduces training costs
- Developed in accordance with EASA CS-FSTD(A) and FAA Part 60 certification requirements, meeting the highest training standards and objectives
- Offers a flexible solution aligned with the highest Full Flight Simulator (FFS) standards
- Supports an exhaustive list of tasks, optimizing crew competencies and fully addressing high-quality training requirements

FLIGHT TRAINING DEVICES

Exail full range of Flight Training Devices (FTD) answers the call for precise, cost-effective flight training solutions. Each FTD is a life-size 3D replica of the cockpit designed to give students the feel of being in the actual aircraft.

TRAINING EVENTS

- FMS Procedures
- Normal and abnormal procedures
- Pre-flight and in-flight checklists
- Precision and non precision approaches
- Extensive list of systems malfunctions consistent with FFS list

BENEFITS

- Quick return on investment
- Accelerates transition training to today's sophisticated aircrafts
- Low-pressure environment
- Perfect solution for MPL2, TR, RL, RO Training types
- Equipment guaranteed for durability and reliability, as well as effective after sale service

FEATURES

- Realistic cockpit replica and simulation software developed with aircraft manufacturer data package
- Open or enclosed flight deck
- Use of customer navigation database
- High-definition projected or collimated visual system
- Ergonomic instructor operating station
- PC-based Windows environment

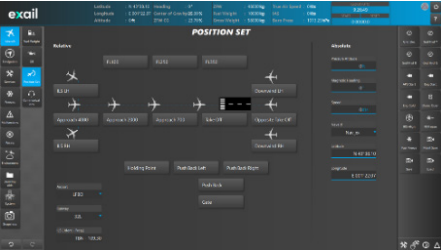

PERFORMANCE AND REALISM

Flight Training Devices (FTD) provide a cost-effective mean of off-loading a significant amount of training tasks from a full flight simulator.

Seamless integration between our high-quality software and rugged, durable hardware, combined to deliver a truly accurate and realistic training environment.
